

White, 1678.

A New

# ALMANACK

For the year of our Lord God,

1678.

Being the year from the Worlds

Creation, 5641.

And the 2<sup>d</sup>. from Bissextile, or Leap year.

Calculated for the Meridian of *Stamington* in *Bedfordshire*, where the North Pole is elevated above the Horizon 52. degrees and 8. minutes; and may serve for all parts of *England*, without any sensible error.

By Thomas

*Culi enarrant gloriam Dei, & opera manuum eius annuntiat firmamentum, Psal. 19. 1.*

Cum Jubilegio.

		Craft. Animar.	Nov. 4.
		Craft. Mart.	Nov. 12.
		Octab. Mart.	Nov. 18.
		Quind. Mart.	Nov. 25.

# Of the Eclipses this Year

1678.

**I**N this year there will happen five Eclipses, three of the Sun, and two of the Moon.

The first is an Eclipse of the Sun on April the 11. day, at our three a Clock in the morning, and therefore invisible as to us.

The second is an Eclipse of the Moon, on April the 26. day in 16. degrees of *Scorpio* about our five a Clock in the afternoon, invisible to us also.

The third will be a small Eclipse of the Sun, on October the 5. day about our five a Clock in the evening and cannot be seen of us; what is to be seen of it will be in the unknown Southern parts of the world.

The fourth will be a total Eclipse of the Moon, on October the 19. day, at 8. a clock at night, and visible to us, and most parts of *Europe*; and in its beginning and continuance will be visible to the more Northern parts of *America*, and to such as Navigate near the *Alphonse* Islands, &c. to whom also it will appear a total Eclipse.

The fifth will be a small Eclipse of the Sun on November the 11. day, about our 9. a Clock in the morning, but invisible to us; yet what of it will be visible, will shew it self to such as sail in the Northern Seas, &c.

On the 25. of March this year, there happens a partile Conjunction of *Jupiter* and *Mars*, their Longitudes and Latitudes being both equal. *Mars* may be seen to Eclipse *Jupiter*. This rare Conjunction may be observed in the morning about three quarters of an hour before the Sun rises, those Planets then beginning to ascend our Horizon.

# January hath xxxi. daies.

Last quarter the 6. day, 43. min. past 1. in the morning.  
 New Moon the 12. day, 21. min. past 5. at night.  
 First quarter the 19. day, 35. min. past 3. in the afternoon.  
 Full Moon the 27. day, 14. min. past 6. at night.

# A Table to know how long the Moon shineth, and when she riseth and setteth

Moons age increasing.	The hours she shines.	Her age decreasing.
☾ H. M. ☾		
1	0 48	29
2	1 36	28
3	2 24	27
4	3 12	26
5	4 0	25
6	4 48	24
7	5 36	23
8	6 24	22
9	7 12	21
10	8 0	20
11	8 48	19
12	9 36	18
13	10 24	17
14	11 12	16
15	12 0	15

The use of this Table is this: The age of the Moon once known, and found in the side of the Table, then answering thereto, shall ye see the hours and minutes of her shining, to be counted from the Sun-setting, all the increasing till the full, and till then she shineth in the evenings, and after the full she shineth before the Sun-rise in the morning, so many hours before the Sun-rise as the Table sheweth. And for her rising and setting do thus all the increase: Add to the hour of the Sun-rising the hours found in the Table, and it shews the hour of her rising. Again, add to the hour of the Sun-setting the hours and minutes found in the Table, and that is the hour of her setting. Then after the full, for her rising do thus: From the Sun-rising, take the hours found in the Table, and the rest shews the rising; and from the hour of the Sun-setting, take the hours found in the Table (borrowing twelve, if the subtraction cannot else be made) and the rest sheweth the setting of the Moon.

The glorious Planet Venus, from the beginning of the Year, until the 9th of April, is our glorious Evening-Star; and after that day, until the end of the year, is our bright Morning-Star, she being Oriental of the Sun.

This Table shews the Interest of any sum of Money from 1 s. to 100 l. from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever. And note, that for the greater exactness the penny is divided into 100 parts; so that 25 parts are a farthing, and 50 parts an half-penny, and 75 parts 3 farthings, &c.

Example:

The Interest of 100 l. for six months one week and one day, thus found by the Table.

l. s. d. c.  
 Interest of 100 l. { for 6 mon. 03--0--0--00 }  
 { for 1 week, 00--2--3--61 } viz. 3-2-7 half-pen.  
 { for a day, 00--0--3--94 }  
 03--2--7--55

Rule

Rules of Mensuration.

**A** fingers breadth is four Barly-corns in thickness; and an Inch three Barly-corns in length: A hands breadth four fingers: A span is three hands breadth: A foot is four hands breadth: A Geometrical Pace is five foot: An English Pearch is sixteen foot and half: A furlong is a hundred and twenty five Paces, or six hundred twenty and five foot: An English Furlong is six hundred and threescore foot, or a hundred thirty two paces: A League is a thousand and five hundred paces: An Italian Mile is a thousand Paces, or eight Furlongs: A common German Mile is thirty two Furlongs: An English Mile is eight furlongs: An Acre is forty Pearches in length, and four in breadth.

How to judge what Weather will follow, by the rising and setting of the Sun.

**T**he Sun rising bright and clear, signifieth a pleasant day: If he rise fiery red, it promiseth rain: If in his rising he be thinly overcast with a cloud, it betokeneth foul weather: If the Sun drive the Clouds before him into the west, it signifieth fair weather: If at his rising there appear a circle about him, and vanisheth away equally, it betokeneth fair weather. Also if he setteth red, it signifieth fair weather: If at his setting he be of divers colours, or clouds like water, it threatens rain. If at the rising of the Sun, his beams seem red, or long, or encompassed with red Clouds, it signifieth great winds: If at his rising there appear a thick mist, or if it raineth in the evening, it threatneth very foul weather to follow. Also if the Sun-beams be spotted either green, pale, or black, or gathered to a Cloud, it signifieth rain. The Sun setting clear without any Cloud, signifieth a fair night to ensue. If the circle or circles about the Sun be clear, and of no continuance, look for fair weather: If there be many circles, it signifieth winds: the redder they are, the more vehement winds. If the circles are here and there broken, and are thick and black, look for cold wind or snow: or if he settle behind a great black Cloud, rain follows.

How Weather is foreknown by the Moon.

**I**f the Moon in the third day of her change, or three days before her full, or in the midst of the quarter, be found of pure light, nothing compassing her, the ends direct up, she promiseth fair weather: but bent to red colour, provoketh winds. The Moon pale, or somewhat black or thick, threatneth rain. When the Moon is five days old, mark the tips of her horns: if they be blunt, it signifieth rain; if sharp-pointed and pricking upwards, great winds. If in the fourth day

after her change, she have a red circle about her, it signifieth winds and rain.

Of the judgment of Weather by the Stars.

**I**f the Stars appear of much light, and seem to be of more bigness and blazing than ordinary, it betokeneth great winds and moisture in that part where they seem so; and in Winter, great frosts. When dim Stars appear with long fiery tayls, it threatneth winds, and great drought: the more in number, the greater will be the effect. Also when Stars seem to shoot or fall, it signifieth great winds in that place: If they seem to shoot in divers places, it signifieth divers winds: If in all places, winds, thunder, lightning, and most tempestuous weather.

How to judge of the Weather by the Clouds.

**B**lack Clouds flying from the east, signifieth rain at night; if from the west, rain the next day: if they flye low, and appear to settle upon the tops of hills, it is a signe of cold weather; if they be full charged, and appear white like towers, hail is at hand: If white clouds appear in winter, two or three days together at sun-rising, it is a signe of cold and snow; but black clouds signifie rain. A red sky in the evening, and a gray morning, is a signe of a fair day. Mists falling in the morning, in Spring or Harvest, also mists over ponds or waters in the morning, shew rain. If the clouds fly swiftly in the Air, it signifies rain from that part of the heavens, especially from the north or south. If thick white clouds gathered together in many places like flocks, or heaps of wool, appear in many places, it is a signe of rain: but if thick dark clouds towards the north or west neer the earth, presently rain; and if like hills a little above the earth, foul weather is over. If mists descend from the hills, and settle in the valleys, it is a signe of fair hot weather next day; or if white mists arise from the waters in the evening.

How to judge of the Weather by the Rain-bow.

**T**he natural signification of the Rain-bow, is to shew rain either past or to come. The Rain-bow appearing when it is fair, is a signe of foul weather; when it is foul if it appear, it is a signe of fair weather: the greener it appears, the more rain; the redder, the more wind: if before noon, then the rain is spent; if the rain-bow appear about one or two in the afternoon, then rain is next. A rain-bow in the morning is a signe of wet (unless there be drought in the air): if it appear in the evening, it is a signe of fair weather (unless the air abound with moisture.) A rain-bow at night opposite to the Moon, is a signe of much small rain and wind to follow. A rain-bow after long rain, is a signe of fair weather presently; if two rain-bows appear together, it is a signe of rain with in one or two days after.

White. 1678.

Of the Fairs

In ENGLAND and WALES;

Revised, Corrected, and Enlarged.

Fairs in January.

The 3 day at Llanthyllter. 5 at Bickerford in Lancashire. 6 at Salisbury, Wiltol, 7 at Llangynny. 12 at Derby. 25 at Lathbury-buz-  
zard, Wiltol, Churchingford, Pothallerton in  
Porkshire, Gravelend. 31 at Llandisfel.

Fairs in February.

The 1 day at Brymly in Lancashire. 2 at Ash-  
born, Bath, Bicklesworth, Bugworth, Farring-  
ton, Golemeu, Lpn, Watston, Reading, Beck-  
lesfield, the Wizes in Wiltshire, Wiltland. 3 at  
Borgrobb, Brymly. 6 at Stafford for six days  
with all kind of merchandise without arrest, 8 at  
Tragaron. 9 at Landaff. 14 at Dundle in  
Northamptonshire, Feversham. 24 at Baldeck,  
Bourn, From, Buckingham, Henly upon  
Thames, Higham-Ferries, Lewesbury, Up-  
pingham, Walden. 26 at Stanford an horse-  
fair. 28 at Chesterfield.

Fairs in March.

The 1 day at Langadog, Llanghellah, at  
Madym. 3 at Bzemwel-brakes in Norfolk. 4 at  
Dekham. 8 at Tragaron. 12 at Stropford,  
Stamford, Sudbury, Woburn, Wrexham,  
Bednam, Alsme in Norfolk. 13 at Wye,  
Bedwin

White. 1678.

Bodwin in Cornwall, Mountbodwin, 17 at Patrington. 18 at Sturbridge. 20 at Alesburg, Durham. 24 at Lanerhemith. 25 at Saint Albans, Ashwel in Hertfordshire. Burton, Cardigan, Cartwolden in Essex, Huntingdon, Saint Jones in Worcestershire, Malden, Malpas, Newcastle, Northampton, Oney in Buckinghamshire, Woodstock, Whitland, Great Chart, 31 at Malmsbury.

Fairs in April.

The 2 at Pithin, Northstret, Rochford, 3 at Lark in Staffordshire. 5 at Wallingford. 7 at Derby. 8 at Fenny-stratford. 9 at Willingworth. 11 at Newport-Pagnel. 22 at Stafford. 23 at Ampthil, at Bewdley, Bzuton, Bzidgstock, Bilson, Bury in Lancashire, Caelecombs, Charing, Chichester, Engfield in Sussex, Gilford, Bishops-Barfield, Hunningham, Ipswich, Kilborough, Longquer, Northampton, Rutley in Sussex, Saint Bombs, Sabobzidgworth, Lamworth, Willton, Woztham, Kilsborough, Warbin in Norfolk, Sapsen in Hartfordshire. 25 at Abingdon, Bourn in Lincolnshire, Buckingham, Calne in Wiltshire, Cliff in Sussex, Colebrook, Luton in Bedfordshire, Dunmow in Essex, Darby, Abingo in Buckinghamshire, Ockham, Woreter, Winchcomb, Clare. 26 at Aenterden in Kent, Weberly.

Fairs in May.

The 1 day at Andover, Blackburn in Lancashire, Bzickhil, Silco in Bedfordshire, Chelmsford, Congerton in Cheshire, Folsingham, Gzghowel, Kimar, Leighton, Leicester, Litchfield, Lextfield in Suffolk, Linfield, Martissent, Louth, Maldstone, Oswestry in Shropshire, Perin, Pzhlips.

Wps. Roston, Pombztdge, Reading, Kippon,  
 Standesd, Stow the old, Stocknalland, Lurford  
 in the Clay, Wsk, Haberil, Wawtoick, Wwendo-  
 her, Wozwozth if not Sunday. 2 at Potolthely  
 in Carmarthenshire. 3 at Abergabenny, Ash-  
 bozn-peak, Arundel, Wzomyard, Wala, Chertsey  
 near Watlands, Chipnam, Church-stretton in  
 Shropshire, Cotobztdge in Glamorganshire,  
 Darby, Denby, Elstoto by Wexford, Punning-  
 ham, Pethy, Mounon, Pon-Caton, Pudder-  
 field, Radlsdale in Lancashire, Tidnel, Waltham-  
 Abby, Thetford. 4 at Chesterfield. 5 at Marchen-  
 leth in Montgomeryshire. 6 at Almsbury, Pop-  
 knighton. 7 at Bath, Weberly, Hanstop, Rew-  
 ton in Lancashire, Parshury, Wyford, Stratford  
 upon Avon, Thunderley, Wzainford. 9 at Paid-  
 stone. 10 at Ashbozn-peak. 11 at Dunstable.  
 12 at Grays-Thozock in Essex. 13 at Wala in  
 Hertford. 15 at Welch Pool. 16 at Llangar-  
 ranog. 19 at Wapfield, Wdehil, Rochester,  
 Welloto. 20 at Walmesbury. 25 at Blackburn.  
 26 at Lenham. 29 at Crambzock. 31 at Pershore.

Fairs in June.

The 1 day at Chappelfrith. 3 at Alesbury. 9 at  
 Watdston, Abington. 11 at Holt, Kintollgate,  
 Warfield, Rewbrough, Rewcastle in Emilm, Oc-  
 kingham, Wellington, Rewport-Pagnel, Ship-  
 ton upon Stow, Wzemel in Norfolk. 13 at Rew-  
 ton in Wadewen in Montgomeryshire. 14 at  
 Bangor. 15 at Wizes, Pershore seven miles from  
 Worcester. 16 at Bealch in Wzeckn. Rewport  
 in Deames. 17 at Hadstock, Pigham-Ferries,  
 Llanbiling, Stotogren. 19 at Wztdgenozth.  
 21 at Hereford, Wstradmerick. 22 at S. Albans,  
 Shrewsbury, Werham in Norfolk, 23 at Barnet,  
 15 4 Dolgelle

Dolgelly in Merion. 24 at Ashburn, S. # The Explanation and Use OF THE M A P and T A B L E.

**F**irst for the Map: The Figures in each Shire of the Map, are to shew you the names of every County, and the Letters in the same are for such uses as I will shew hereunder.

You must understand, that London is in Middlesex, which County of Middlesex hath the figures of 22 in it, and the little black speck or spot therein, signifieth London. Now if you would readily finde the name of any Shire therein, and how many miles the middle of the said County (in a streight line) is from London, and what point of the Compass it lieth from the said City, resort then to the Table of Shires on the other side, and it will resolve you.

As for Example :

Berkshire, it hath the figure of 1 in the Map, and so it hath likewise in the Table; where is shewed that the middle of heart of that Shire is 40 miles from London in a streight line, and it lieth full West from the City; and looking forward toward the right hand, it sheweth it hath no City, 11 Market-towns, 2 Castles, 140 Parishes, 3 Rivers, and 13 Parks. Again, Buckinghamshire hath the figure of 3 in the Map, and so it hath before it in the Table; the heart or middle of which Shire is from London 35 miles, and lieth North-West and by West from the said City; it hath no City, 11 Market-towns, no Castle, 185 Parishes, 2 Rivers, and 15 Parks. And so of the rest.

The use of the Letters in the Map, is this :

Scotl. signifieth part of Scotland, I part of Ireland, F part of France, M the Isle of Man, W the Isle of Wight, L the Lizard-point, H Holy-head, the \* the Irish-Sea, B the British or English-Sea, G the German-Sea, Ba Barwick, D Dover, N Newcastle, C the Points of Compass, S the Scale of Miles by which you may measure the distance of any place: for every black degree is five miles, so is every white.

The 39 Shires from Berkshire to Yorkshire are the English Shires, and the other 13 from Anglesey to Radnorshire are Welsh.

It may be something farther in Miles to the middle of each Shire, by reason of the crookedness of the High-ways, Hills, and Vallies; but what is here set down is meant in a streight line from London.

A Geographical Epitome of the M A P  
of England and Wales; wherein is shewed how  
each Shire is bounded and joyned to each other, and  
what Point of the Compass every county lieth from the Ho-  
nourable City of London: (being lately published) the  
use of which is explained in the foregoing Page.

C 2

England

**E**ngland containeth 29568000 Acres.

Scotland containeth 14432000 Acres.

Ireland containeth 18000000 of Acres.

The 17 Provinces of the *Low Countries* contain in the whole, 10791000 Acres; whereof those under Spain, 7197000 Acres.

Those United under the States, 3599000 Acres.

France in its 32 Provinces containeth 82879000 Acres.

### The Explanation of the following Table.

**F**irst, get a Chain or Chord of two perches in length, and divide each perch into 10 equal parts, which I call links, each of those parts will contain 19 inches and 8 parts of one inch: the inch divided into 10 parts, 10 of those links makes 16 feet and an half, our common perch statute-measure: 100 square links makes one perch of land, 40 square perches make one rod, 80 half an acre, 120 three rods, and 160 square perches one acre.

This following Table doth contain 5 Columns: The first Column on the left hand sheweth the length of the Acre in perches and half perches; the figure of 5 under every length, signifieth 5 links, or half a perch forward: The other four Columns shew the breadth for one Acre; the first Perches, the second Links, the third Inches, the fourth Parts of one inch, the inch divided into 10 parts.

And also in this last Column in many places of this Table, you will see a small Figure placed on the right hand of p, which is no more than one 10th part of an inch divided into 4 parts; and the right or neereft part I have observed.

*Example:* At 13 perches in length, the breadth will be found 12 perches, 3 links, 1 inch, and 5 parts of an inch, and 1 part of a fourth; which is a quarter of a tenth part. At 13 perches and an half in length, which is expressed by the figure of 5 under 13, you will finde the breadth 11 perches, 8 links, 19 inches, 2 parts and 3 quarters.

# A Table to set forth Acres :

Declaring the breadth for one Acre,  
for any length given in Perches, or in Half  
Perches, from 10 to 80.

Exactly Calculated, by *Thomas White*, Surveyour.
